

Alges Mobile Acoustic Shells

Technical Specification

- Unit Weight: 375lbs. (170kg)
- Panels are flat in 1/5" (3cm) thick construction. 59" (1.5m) wide panels are constructed of 1" (2.54cm) honeycomb core with 0.08" (2mm) thick, impact resistant HPL skin on front and back for maximum range of audible frequencies.
- Base and Shell Frame are constructed of black powder-coat painted steel.
- Includes counterweighted base system.
- Rectangular or Tapered canopies adjust to 4 possible positions: 45°, 60°, 75° or 90° angles, with overall height from 11'6" (3.5m) to 12'6" (3.81m).
- Designed with heavy-duty 3" swivel casters for stable rolling and easy positioning.
- Lift mechanism includes a spring-assisted crank handle to raise and lower the shell.
- Panel finishes are available in Oyster White or Woodgrain Laminate.
- The storage height of 5'7" tall in the storage position, will pass through standard doorways.
- Panels nest for compact storage.

Mobile Acoustic Shell Data:

Max Height.....	12'6" (381 cm)
Storage Height	5'7" (170 cm)
Width.....	59" (150 cm)
Storage Depth.....	34 1/2" (88 cm)
Canopy Depth.....	39 2/5" (100 cm)
Panel Weight (approx.).....	2.46lbs/ft²
